Class Tutor User Manual & Cohort Administration

Class Tutor Responsibilities: As a Class Tutor, you monitor student enrollment progress, supervise assigned section rosters, authorize student password/PIN resets, and generate attendance reports for Department leadership.

1. Staff Login & Academic Workspace Setup

STEP 1 Authenticating to the Faculty Portal

1. Navigate to `http://localhost:3000/login`.
2. Sign in using your faculty email (e.g., `angelb1@srmist.edu.in`) and password: `Electify@2026`.
3. Select your active **Academic Session** (e.g. `2025-2026 Even Semester`) on `/faculty/session-select`.

2. Section Switching & Multi-Section Supervision

STEP 2 Managing Multiple Assigned Sections

Electify allows tutors to oversee multiple sections across programmes:

- **Active Section Switcher:** Look at the top bar navigation. Click the section badge to switch active views (e.g., between *Section A* and *Section B*).
- **Claiming New Sections:** Navigate to **Assign Sections** (`/faculty/assign-sections`), choose your newly allocated class section from the university catalogue, and click **Claim Section**.

3. Live Section Roster & Student Tracking

STEP 3 **Reviewing Student Enrollment Status**

1. Navigate to **Section Roster** (`/faculty/section`).
2. The roster displays all students enrolled in your active section with their:
   - SRM Register Number and Full Name
   - Registration Status: **Confirmed**, **In Progress**, or **Unregistered**
   - Selected Elective Course Code and submission timestamp
3. Click the **"Unregistered Only"** filter toggle to isolate students who have not yet submitted their choices before the window closes.

4. Authorizing Student Password & PIN Resets

STEP 4 **In-Person PIN Reset Authorization**

To eliminate unauthorized credential compromise during competitive registration, students cannot self-service reset passwords online. Tutors authorize resets directly:

1. Navigate to **Students** (`/faculty/students`) in the faculty sidebar.
2. Search for the student by their Register Number (e.g., `RA2411...`).
3. Verify the student's physical identity in the classroom.
4. Click **Authorize PIN Reset**. The system generates a secure 15-minute token allowing the student to sign in and set a new password.

5. Exporting Official Section Reports

STEP 5 **Generating Class Attendance & Allocation Lists**

1. Navigate to **Tutor Reports** (`/faculty/tutor-reports`).
2. Review the summary analytics: class turnout percentage and course distribution.
3. Click **Export Class List (PDF)** to generate an official verified PDF report containing student signatures, course allotments, and timestamps for submission to the HOD.
